C

Cadmium, effect on mortality, tumors and tissue levels in mice, 239.
Calcium metabolism in senescent mice, 65.
—, phosphorus and lactose and source of protein in zinc-deficient and -adequate diets, effect of, in rat, 225.
— recovery from magnesium deficiency in rat, 44.
—, serum, and phosphorus in rachitic chicks, effect of vitamins D_2 and D_3 on, 133.
Calculi, citrate, influence of amino acid supplements on occurrence of in rats, 358.
Calvert, C. C., I. D. Desai and M. L. Scott. Effect of linoleic acid on nutritional muscular dystrophy in the chick, 307.
Carbohydrate, dietary, effect on glucokinase and mannokinase activities of rat tissues, 273.
Carcass quality, effects of feeding frequency on, in pigs, 251.
Carew, L. B., Jr., and F. W. Hill. Effect of corn oil on metabolic efficiency of energy utilization by chicks, 293.
Carew, L. B., Jr., D. T. Hopkins and M. C. Nesheim. Influence of amount and type of fat on metabolic efficiency of energy utilization by the chick, 300.
Cattle, effect of magnesium and sulfur on cellulose digestion of purified rations, 60.

CHAIKOFF, I. L. See Abraham, S., 273.
CHANCE, RONALD E., EDWIN T. MERTZ AND JOHN E. HALVER. Nutrition of salmonid fishes. XI. Isoleucine, leucine, valine and phenylalanine requirements of Chinook salmon and interrelations between isoleucine and leucine for growth, 177.
CHEN, PHILIP S. JR., AND H. BRUCE BOSMANN. Effect of vitamins D_2 and D_3 on serum calcium and phosphorus in rachitic chicks, 133.
Chicken(s), effect of corn oil on metabolic efficiency of energy utilization by, 293.
—, effect of protein level of diet on nitrogen excretion, 34.
—, feeding of tung oil to, 365.
—, influence of amount and type of fat on metabolic efficiency of energy utilization by, 300.
—, influence of dietary phytol, isophytol, and squalene on tocopherol content of liver tissue, 111.
—, mercury and silver interrelationships with copper in, 107.
—, protein reserves; evidence for their utilization under nutritional and disease stress conditions, 165.
—, rachitic, effect of vitamins D_2 and D_3 on serum calcium and phosphorus, 133.
—, thyroxine and antithyrotoxic effects in, 325.
Children, amino acid requirements of; nitrogen balance at minimal level of essential amino acids, 115.
Chlortetracycline, effect on growth and gastrointestinal urease activity of chicks, 79.
Cholesterol and linoleic acid stereoisomers, serum and aortic lipids in rabbits fed, 314.
—, blood, and effect of ethyl esters of polyunsaturated fatty acids of cod liver oil in rat, 262.
—, dietary, effect on skin lesions of rats with subacute magnesium deficiencies, 73.
Cholesterolemia, effect of dietary protein level on, in rat, 149.
Choline-deficient rats, glycerol metabolism in, 103.
CHOW, BACON F. Growth of rats from normal dams restricted in diet in previous pregnancies, 289.
CHOW, BACON F. See Sloane, Howard N., Jr., 379.
Chromium, effect on mortality, tumors and tissue levels in mice, 239.
Cod liver oil, ethyl esters of polyunsaturated fatty acids, hypocholesterolemic activity, in rat, 262.
CONNELL, W. FORD. See Beveridge, J. M. R., 119.
Copper, effect on growth and gastrointestinal urease activity of chicks, 79.
—, silver and mercury interrelationships with, in chicks, 107.
Corn oil, effect on metabolic efficiency of energy utilization by chicks, 293.
— — plant sterols and hypocholesterolemia, effect in man, 119.
Creatine reduction in muscle, liver and brain of dystrophic animals, 193.
CROW, D. G. See McLaren, G. A., 218.
CUNNINGHAM, H. M. See Friend, D. W., 251.

D

Diet(s) and digestive processes, effect on proteolytic enzymes, in rat, 94.
— and digestive processes, effect on proteolytic enzymes, rat, 94.
—, dispensable amino acids in quantities occurring in gelatin, glycine, or L-4-hydroxyproline, and growth depression, in rat, 158.
—, effect on energy utilization of physical form, composition and level of intake, sheep, 49.
—, protein level of, effect on cholesterolemia, thrombosis, atherosclerosis and hypertension in rat, 149.
— restriction of normal dams in previous pregnancies, and effect on growth of progeny, in rats, 289.
Digestion and diet, of processes on proteolytic enzymes, in rat, 94.
—, cellulose, effect of magnesium and sulfur on cellulose digestion in sheep and cattle, 60.
DAVIS, G. K. See Martin, J. E., 60.
DESAI, I. D. See Calvert, C. C., 307.
DESAI, I. D. See Scott, M. L., 39.
DRAPER, H. H. Physiological aspects of aging. V. Calcium and magnesium metabolism in senescent mice, 65.
Dystrophy, anti-muscular, relative activity of *d*- and *l*-epimers and other isomers of tocopherol in chick, 39.
—, muscular, biochemical changes in. II. Phosphorus metabolism in normal, nutritional and hereditary dystrophic muscles, livers and brains of animals, 193.
